

MINUTES - ST. LOUIS HOSTA SOCIETY MEETING, SUNDAY, MARCH 15, 2020

Phyllis Weidman called the meeting to order. She thanked everyone for coming.

Dave Poos handed out the Treasurer's report. Copy attached.

Phyllis reminded everyone that the club has a Instagram account as well as being on Facebook. You can check there for any changes in programs, dates and times.

The plant sale is still scheduled for May 16 & 17, with set up on Friday night the 15th at Missouri Botanical Gardens.

The Society's March 15 meeting will feature Wally Cammarata, Master Gardener, who will speak on Understanding the Shade Environment, and give a powerpoint presentation.

Phyllis reported that she, Andrea Michalak, and Barb Moreland got together at Phyllis' home and made 12 troughs and will plant some and sell them at the Mo Bot plant sale in May.

Saturday, May 2, 8am, scheduled for work on the hosta beds at Missouri Botanical Gardens.

There is a sheet on the table where you can sign up if you have any interest in the trip to Hornbakers Gardens on July 12. Once Phyllis sees how many interested in this trip (and chance to hear Bob Solberg talk) transportation will be arranged.

Remember in 2021 it will not be possible to have a sale in May at Mo Bot because of the construction. There may be a couple of other places on the grounds that we can use, smaller. This is something we need to think about.

Jolly Ann suggested Bobbex to deter deer. She looked it up and it is environmentally friendly. Basil recommended Ortho Deer B Gon Repellent.

Following this meeting Wally Cammarata, Master Gardener gave his presentation.

Respectfully submitted,
Jolly Ann Whitener, Secretary
